

Patent Watch

Why carry out a Patent Watch?

Patents are an unparalleled source of information:

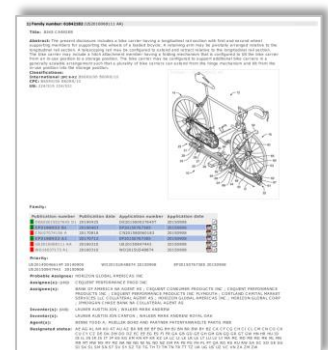

- 70 to 80% of technical information appears only in patents;
- All technical fields are concerned.

The Patent Watch: an essential tool that enables you to:

- Monitor your competitors and the evolution of technology;
- Orient your R&D;
- Identify development opportunities and seek potential collaborations.

A continuous watch on your areas of interest (technology, competitors, etc.)

- Your watch strategy is initially defined in collaboration with a patent analyst and a patent engineer from Germain Maureau specializing in your field.
- Each month, you will receive a report identifying newly published patent families with, for each family identified, the following information:
 - ✓ bibliographical references;
 - ✓ names of applicants and inventors;
 - ✓ international and cooperative patent classifications;
 - ✓ abstract, figures;
 - ✓ access to the original PDF document.

IPShare is a secure platform that allows you to:

- Centralize all the information from your monthly newsletter;
- Share the information with your collaborators;
- Search by keyword, class, applicant, date;
- Annotate, highlight documents or add notes (comments);
- Classify documents by level of relevance.

In short, to manage and make full use of your Patent Watch!
